Work Experience

Petroleum Geoscientist

CHEVRON NIGERIA LIMITED - Lagos, NG

May 2017 to Present

Petroleum Geoscientist, Downstream-Gas

- Develop Geologic Reservoir Models using seismic data, well logs. Characterize reservoir, Volumetric and Risk Assessment
- Integrate Production forecast from Asset Management to generate Forecast Crude oil and Products Lifting Program
- Crude Supply unit data management. Implemented effective reporting skill by developing new template, preparing reports (Production, Curtailment, Reconciliation} for Government agencies (DPR, NNPC, NAPIMS), Partners and Traders
- Monitoring and supporting Terminals in providing necessities Clearances, negotiating with Government official.

Well Intervention/Workover Engineer

HALLIBURTON CONGO SAS

April 2013 to February 2016

Delivered two Re-entry (side track) Project design using Hydraulic Workover (HWO) Unit, from Technical specific data

(Well-control, simulation, pumping pressure, rotation speed, etc.) to operational procedures (Rig Up/ Down HWO, Mud system, Well-head, shaker, degasser, etc.)

- Delivered and directed several well intervention Workover-Completion Project Designs ranging from Completion

Replacement, ESP Replacement, Perforations, Gravel pack, Cement plug, acidizing, Fishing, etc.

- Elaborated two significant Project Planning and supervised the execution in tracking work progress and achievements, cost and personnel management

- Experienced a comprehensive One-year field development program in well intervention (Workover, Coiled Tubing, Process and Pipeline)

Junior Geologist, Iron ore project

CORE MINING LIMITED

June 2011 to February 2013

- Directed geology fieldwork and Drilling planning, generating location and drilling points maps using MapInfo after interpretation of Aeromagnetic and Gravimetric survey

- Supervised geology work during drilling, ensuring proper handling of Core, measurement and run well log (GYRO LOG)
- Performed Core analysis (litho, structural, geotech), integrating core log and geochemical analysis into Well Logger for well correlation.
- Associate Site security Manager: elaborating security procedures, tools for tracking asset and personnel, performing Site Monthly Inspection, coordinating weekly meeting with lead security officer, reporting to the Site manager, generating security awareness.
- Mentored graduate geologist on fieldwork and lab, on sampling method, core analysis, generating maps with MapInfo

Trainee Geologist

HYDROCARBON MINISTRY - Brazzaville, CG

February 2011 to June 2011

Reviewed majors Oil exploration reports to comprehend to structural framework and the stratigraphic settings of Congo

Petroleum basin "Bassin Cotier" also the inner basin "Bassin de la Cuvette"

- Hands-on seismic interpretation on seismic cross section, drilling operations process.

Education

Master in Petroleum Geosciences

University of Port Harcourt

2017

Master in Geology

Marien Ngouabi University - Brazzaville, CG

2010

Skills

- PROJECT PLANNING (2 years)
- MAPINFO (1 year)
- SECURITY (1 year)
- SEISMIC (1 year)
- EXCEL (Less than 1 year)

Additional Information

COMPETENCIES

•Project Planning •Risk Analysis Management •Site Security Management •Team Leadership
•Communication Skill •Team
Work •Negotiation •Mentoring •Iron ore exploration •Reservoir Modeling •Reservoir Characterization
•Reservoir Engineering
•Well Intervention •Seismic Interpretation •Log Interpretation •Workover-Completion

TECHNICAL SKILLS

Microsoft MS office (Outlook, Word, Excel, AND PowerPoint)
Geosciences software: Petrel E&P, TechLog, GIS (MapInfo)

Languages Proficiency: French (writing, speaking), English (writing, speaking), Portuguese
(elementary)
