Python. Excited to broaden my horizon and find growth opportunities at your company.

Work Experience

Backend Engineer

PaySync Technologies - Lagos, GU
November 2021 to Present

- Designed and developed the architecture for the system following a microservice approach
- Refactored about 40% of the code base to improve efficiency and run time
- Attended regular meetings with the team in redefining the features and requirements for the system
- Created features for core backend functionalities

Software Developer

The Middlemaan Enterprise - Lagos, GU
November 2020 to November 2021

- Worked independently to design, develop and test code for The MiddleMaan
- Supervised a team of 3 developers and 2 business analysts engaged in a project for the creation of a new eCommerce system.
- Trained and managed about 3 developers and discussed issues in order to provide resolution and apply best practices.
- Communicated with third-party product owners to illustrate deficits and bottlenecks within existing software.
- Created procedures for system monitoring, recovery, backup, and optimization.
- Developed and updated tracking spreadsheets using google spreadsheet

Freelancer / Software Developer

Home - Lagos, GU
January 2020 to November 2020

- Gathered and defined customer requirements to develop clear specifications for project plans.
- Worked with teams ranging from 3 to 7 people in developing optimal solutions to pressing problems
- Created a telegram bot that did numbers of over 1000 users in its first week
- Translated verbal customer requirements into written use cases and testable development stories.
- Modularized, and updated old code bases to modern development standards, reducing operating costs and improving functionality.

Science Intern

Hash Analytics - Glasgow, KY
November 2019 to January 2020

- Presented findings orally and in writing with advanced mathematical models.

● Compiled, cleaned, and manipulated data for proper handling.
● Tested and validated models for accuracy of predictions in outcomes of interest.
● Leveraged mathematical techniques to develop engineering and scientific solutions.
● Developed polished visualizations to share results of data analyses.
