AYODEJI LAJUBUTU

Snr. Developer - Soft Alliance and Resources
Lagos, GU
-Email me on Indeed: http://www.indeed.com/r/AYODEJI-LAJUBUTU/ac46b2762cbe7413

• TOGAF 9 certified Enterprise Architect and Software Polyglot.
• Integration Specialist with proven track record in Custom Solutions - ERP
Integration (Microsoft Navision Dynamics, Oracle Financials), Financial
Solutions Integration (Payments/Remittances, Collections) etc
• Currently working with a team of BA and Developers to deliver a Bill-
Presentment platform that allows All Banks/Payment Processors make
payments on Bills Generated by MDAs in Lagos State.
• Directly responsible for Integrating the Bill-presentment platform (Paygate)
with Payment Processors and Banks (10 processors integrated already)
• Led a team of developers to architect and develop a collection engine
responsible for processing over 400,000 transactions in 5 years.
• Experienced Software Developer/ Solutions Architect who has led project teams
and development efforts for several companies in various sectors in Nigeria.
• Over 10 years cognate experience in best-in-class software solution delivery
and project/process management.
• Highly organised and effective communicator

Willing to relocate: Anywhere
Sponsorship required to work in the US

Work Experience

Snr. Developer
Soft Alliance and Resources
October 2015 to Present

Limited)

• Vendor Collection Portal for AccessBank using ASP.net MVC and SQL
Server with user authentication against Active Directory.
• PayGate - Invoice presentment platform integrated with Oracle ERP to allow payment of Invoices across
various channels (Banks, Web, USSD
etc) and easy reconciliation in Oracle Financials.
• Single-Billing Platform for Lagos State Government. State-wide Financial
Analytics module for the Governor and MDA-Specific module for
Permanent Secretaries and DGs.

(Snr. Manager (Software Development)
Chams PLC
May 2014 to August 2015

Redesigned the company's Computer-based-testing engine using ASP.net
MVC, Microsoft Silverlight and Microsoft SQL-Server. Currently developing an HTML5 version.

• Redesigned the company's flagship product (eID) using web and modern
technologies. Tasks performed include:
• System Architecting and Design
• Developed the new web-based and more robust Identity management
solution (Smart-ID)
• Designed a mix of suitable database alternatives for each of the modules - MySQL for field capture and Oracle for BackOffice
consolidation
• Developed a synchronization application to allow for synchronizing
data captured on-field with the Oracle back-end
• Successfully rolled out the solution for the ongoing Osun Residency
project (target goal is to enrol over 6million residents) and several
smaller projects.
• Developed the Chams e-Education Solution (CEEDS) and its various
modules:
• Pre-Registration
• Onsite/Biometric Registration
• Student Portal
• Scholl Admin Portal
• Confirm Me: Part of the team developing Nigeria's premier Identity
verification portal connecting to various data-sources BVN, JAMB, Credit
Registry etc

remotely
June 2012 to April 2014

Peers Consulting Limited - Redesigned and upgraded the Mambilla®
HR/Payroll application from .Net framework 1.1 to the latest framework
version (4.0) version. Also remodelled the applications dashboard and reworked the Data/Business Logic Layer to use the LINQ and Entity
Framework.

• Risk Control Nigeria Limited - Led a team of developers to develop and deploy an address verification portal for Risk Control's clients which
includes commercial banks and Oil and gas majors. The solution provides for a complete workflow to track status from initiation to completion with an integrated text messaging component for remotely updating verification status.

• Lagos State Geographical Information System (LAGIS) - Architected,
Developed and Deployed a web-based payment engine to allow for citizens and relevant stakeholders/professionals pay for GIS resources and
download via the LAGIS infrastructure. The solution which was built for
Interspatial Technologies Limited interfaced with the OnPoint web-based
GIS application and the Oracle Datastore.

• Nigeria Army Finance Corp - Led a team of 2 developers to build, deploy and implement a web-based payroll system for Nigerian Army. The
solution which was a replacement for an "enterprise" payroll system, was
designed, coded and implemented in a record-breaking time of 2 months.

The prior solution couldn't be customised to suit the clients needs close to a year after implementation started. The solution runs across the Armys
enterprise WAN comprising of 11 different paypoints nationwide.

• Office Of The Surveyor General Of The Federation (OSGOF) - Business
Process / Data Modelling. Led a 4-man team of database, GIS and functional specialists to carry out a process review and data modelling
exercise for OSGOF. The project involved:

• Identifying the business process of the establishment
• Identifying existing applications and functionality
• Identifying the gaps and consolidating into one process
• Mapping the process into a data model using Oracle Data Modeller
• Mapping the organisations current process using Accuprocess Business
Process Modelling Software.
• Build the model into an Oracle database

• Toyota Nigeria Limited - Architected, developed and deployed a web- portal for interaction between Toyota Nigeria Ltd. (TNL) and Toyota
dealers across the country. The solution interfaces with Microsoft
Dynamics Navision software at TNL and the dealerships and provides a
custom web-front for the end users across the nine (9) dealerships and
TNL. Features of the web-based application includes:

• Provision for Inventory checking across dealerships and the principal
(TNL)

• Provision for ordering of parts/motor vehicle seamlessly from the dealership with requisite sales/ purchase orders raised in the Navision
ERP of the requesting and destination systems

• Notification of relevant persons throughout the order processing cycle from Order Placement through invoicing to Fulfilment/Delivery/Picking.

• Interaction between the dealership and the principals' ERP for checking of salient information such as Service Rate, Warranty status, Aging
Payments etc

• Nigeria Army Finance Corp - Served as project consultant on the Nigerian
Army Biometrics Enrolment Exercise (NABEE). The project which was
carried out across the federation registered over 40,000 army personnel across the federation.
Responsibilities included:
• Interfacing with the company providing the solution
• Second level technical support
• Designing an implementation plan for integrating the solution with the
Payroll system.

Chief Technical Officer
Grid Infotech Limited
January 2006 to December 2013

GiCollect - Led a team of developers to architect and develop a collection
engine to facilitate fees collection from Bank Branches to educational
institutions. The solution is currently in use at Branches of six commercial
banks and is used by the University of Lagos and the Distance Learning
Center, University of Ibadan.

University Of Lagos - Led a team of developers to architect and design a full-fledged e-payment solution
for the school's Bursary department in line with federal governments' directive that all MDAs fully migrate
to e-
payment. The first phase of the two-phased solution was deployed in record time and the second stage
which will culminate in the development and deployment of a best-of-breed e-remittance solution is at
an advanced stage.

University Of Lagos Bursary - Developed a web-based, workflow- driven Cheque-writing application for
the bursary unit of the school. The
solution serves the cheque-writing requirements of the school and processes cheques of about six of the
institutions banks including the
CBN. The solution has been able to drastically reduce processing time for
Contractor/Staff cheques.

University Of Lagos Bursary - Led a team of developers to develop a
web-based Receipt writing application for the school. The solution helped
automate the process of writing students receipt within the school.

University of Lagos CITS - Led a team of developers to design and implement a full-fledged web-
infrastructure for the school with Online
payment / registration system. The solution was built using industry- standard best-practises and a mix
of Open-Source (PHP/MySQL) and
Enterprise tools (VB.Net) (www.unilag.edu.ng)

Yaba Colllege Of Technology - Led a team of developers to implement a full-fledged Human Resource
management System. Also developed an inventory application for the school.

Nigeria Police Co-operative
January 2010 to May 2012

Developed and implemented a biometrics
Identification and Enrolment system for the co-operative which is
acclaimed to be the largest in Africa. A new upgrade to the solution was
deployed in January, 2015.

• General software consultancy for Peers Consulting Limited with services
ranging from software development, deployment, application tuning and customisation e.t.c. Deployed
a Clinic management software developed for
West African Portland Cement (WAPCO).

Part-Time Trainer
CPI Nigeria Limited
March 2003 to May 2007

Did several corporate trainings for the organisation. Trained
staff of Equity Bank and Chevron Texaco Nigeria Limited on
VB.Net technologies and Databases Integration and design.

Consulting Developer
Cybergarden Technologies
October 2005 to January 2006

Intercontinental Bank PLC - Responsible for designing an online
banking portal for the bank - post consolidation. The solution was
responsible for providing an integrated web-front for the disparate
banking applications used by the merged banks - Equity bank,
Gateway, Global Bank & Intercontinental Bank.

UBA group - Was responsible for architecting, designing and developing an N-Tier Web-based Survey
Application (VB.Net, ASP, ASP.net, SQL
Server 2000 and Oracle) for UBA group. The application was developed under the brand name of
"Cybergarden Technologies" under a contractual
agreement. The project involved requirements gathering from
Performance management department and implementation on the groups
WAN which spans across all the states in Nigeria to within and beyond the
West- African Subregion (New-York and Ghana).

Consultant
Ozone Consulting Limited
July 2004 to September 2005

PEERS CONSULTING - Part of a team of 3 Developers to Architect,
design and develop an N-Tier Web-Based Human Resource Management
Application (VB.NET, ASP.NET, Oracle 9i and SQL Server 2000 and Crystal
Report). This Application Design was targeted at two Data Stores, Oracle
9i and SQL Server 2000 with the core of its business logic centered at one
layer. The Application is Currently Deployed and in use at several
private/public concerns including THE PRESIDENCY, STATE HOUSE,
ABUJA. The project was designed for Peers Consulting Limited.
Roles Played:- Architecting, User Interface Design, Business logic
Development, Database Design, Oracle PL/SQL Script Functions and Procedure
conversion and Database Indexing and Tuning.

PEERS CONSULTING - Part of a team of 3 Developer to Architect, design and develop an N-Tier Web-
Based Payroll Application (VB.NET, ASP.NET,
Oracle 9i and SQL Server 2000 and Crystal Report). This Application
Design was targeted at two Data Stores, Oracle 9i and SQL Server 2000 with the core of its business
logic centered at one layer. The Application is
Currently Deployed and in use at THE PRESIDENCY, STATE HOUSE,
ABUJA. . The project was designed for Peers Consulting Limited.
